WEED-NO-MORE® "80"

Is Your Best Buy!

Gives 27% More Coverage on small grains than 1949 Weed-No-More.

Goes Further Per Gallon because it contains 80 ounces of 2,4-D acid — 60% more acid than last year.

Costs Less to use than last year. In 1949 on an acid content basis, Weed-No-More cost 22.6c. per ounce. Weed-No-More "80" costs only 12.2c. per ounce of acid.

— And It Is a New, Tested Weed-Killing Formulation! Field tests showed the most effective 2,4-D ester weed-killer contains four ingredients — oil, coupler, emulsifier and ester. Any formulation which lacks any one of these ingredients is inferior. Weed-No-More "80" contains them all — each ingredient itself tested and found to be the best available.

Control Weeds in Your Grain or Flax with

WEED-NO-MORE® "80"
(2,4-D Quick Penetrating Butyl Ester)

Rev. and Mrs. Warren Honored on Departure

On Friday evening, June 23, the congregation of Carbon United Church held a farewell for Rev. and Mrs. C.A. Warren in the form of a pot luck supper. After supper a short program was enjoyed. Solos were rendered by Mrs. Bob Shaw and Don McLeod, and Shirley Hay and Joanne Ohlhauser sang a duet. On behalf of the congregation, Mr. Ross Thorburn presented Rev. and Mrs. Warren with a 96-piece dinner set.

On Monday, June 26, the Carbon United Church Junior Ladies Aid honored Mrs. Warren at a farewell party at the home of Mrs. J. Buchner. She was presented with an engraved sterling silver coffee spoon.

The Carbon United Church Sunday School annual picnic was held at the park on Wednesday, June 28. There was a good attendance, with swimming and then races of all kinds. The tables were set for both parents and children and a picnic supper was enjoyed by all.

Mr. Eli Spry, Sunday School superintendent, presented Rev. and Mrs. C.A. Warren with a silver cake plate engraved from 'The Carbon United Church S.S.'

Rev. Warren has accepted a call from Taber and will take up his duties there on August 1.

Margaret Schmierer is spending the summer holidays at El Dorado with her uncle, Mr. W. M. Prescott.

There was a good crowd at the Grand Forks sports on July 5. In the ball tournament Hesketh defeated Grand Forks and Orkney defeated Ghost Pine. Orkney won the final game from Hesketh. Beveridge Lake school beat Gamble school in the scheduled softball game.

Recent visitors at the home of Mr. and Mrs. Bill Hammel were Mr. and Mrs. R. Hammel and daughter, Opal, of Dickinson, N.D., Mrs. E. Poline and son, Billy, of Bow Bells, N.D., and Mrs. T. Little of Calgary. Mr. R. Hammel Hammel and Mrs. Poline are brother and sister to Bill Hammel and it was the first time the latter had seen them in 42 years.

At the Village Council meeting July 3 a report on the analysis of the proposed village water supply showed the water fit for human consumption. Further discussion on prospecting for a water supply took place.

Possibility of forming a fire brigade was also discussed. Tentative plans include appointment of a fire chief, deputy fire chief and a crew of eight firemen.

Donkey softball Friday evening drew a big crowd which enjoyed the many laughable situations arising during the game. Officially the ladies beat the Lions Club, but we think the donkeys won.

An interesting water safety display for junior farm clubs was held in the Carbon pool Friday afternoon. The event was sponsored by the Drumheller District Agricultural Society and was under the direction of Wm. Ritson-Bennett.

Weed Seed Valuable For Industrial Uses

TORONTO.—Weed seeds that have been reducing the value of western grain may be worth something. Screenings from coarse grain crops of wild mustard and stinkweed have been found to yield oils which are a possible raw material for edible and industrial uses.

This was outlined to the conference of the chemical institute of Canada in a paper by Dr. N. H. Grace, Dr. H. J. Lips and A. Zuckerman of the national research council, Ottawa.

Up to 100,000 tons of these weed seeds are found with the prairie grain crop, though the amount probably will be reduced through the use of weed killers.

Oil from wild mustard and stinkweed seeds resembles oil from rape-seed, a crop readily cultivated on the prairies. They can be used as sources of edible fats and for many industrial purposes such as blown and sulphate oils, plasticizers, lubricants and raw materials for making valuable chemicals.

Four University of Saskatchewan research chemists stated that farmers can hope to benefit from increased knowledge of the manner in which plants take up fertilizer.

In a joint paper H. G. Dion, J. E. Dehm, A. St. Arnaud, and Dr. J. W. T. Spinks said that in their experiments they mixed radio-active phosphorus with fertilizer phosphorus. Using geiger counters, they followed the path of the radio-active phosphorus from the soil through the plant, and found out how much fertilizer was taken up and where it went.

FUNNY And OTHERWISE

Two American soldiers who had just arrived in Britain found the telephone boxes somewhat confusing. One of them was trying to make a call.

After manoeuvring with buttons A-B and dialing the operator, he had just pressed one of the buttons when a V bomb exploded nearby. Stumbling out on his knees, and covered with dust, he found his pal flat on the pavement, somewhat hurt. He said: "Honest Joe, all I did was press button A."

In the club two men of middle age were discussing the young men of today.

First: "Look how reluctant young men are to marry and settle down."

Second: "That's so. They seem to fear marriage. Why before I was married, I didn't know the meaning of fear."

Hello, Bill. How's your eye getting on?"

"Oh, not so bad, Fred; it's mending slowly. Me and the missus have made it up now."

"That's good!"

"Yes, she only threw the tablecloth at me this morning."

She—You must find collecting a rotten job. Nobody likes to see you.

He—On the contrary, they all ask me to call again.

Mavis danced last night with a young Frenchman who cannot speak English."

"How quaint!"

"Very. This morning she bought a French dictionary and tonight she is going to slap his face."

"Could I try on that red dress in the window?" asked the bright young thing.

"There's no need to do that," the elderly shop-assistant answered coldly; "we have several fitting-rooms."

English Girl To Travel In Rural Sask.

REGINA.—In search of adventure and opportunity a 24-year-old English girl has travelled more than 5,000 miles to operate a mobile unit for the treatment of arthritis in Saskatchewan.

She is Gwyneth Miller of Dartford, Kent, a London-trained physiotherapist who will use her skill to help arthritis sufferers in rural areas of the province.

Under a 12-month contract with the Saskatchewan division of the Canadian Arthritis and Rheumatism Society she will help to set up an arthritis centre at Regina hospital before going out with the mobile unit.

The unit consists of a car equipped with infra-red lamps, short-wave diathermy equipment and a wax bath.

Construction Of Spur Oil Line To Start In August

WINNIPEG.—Construction of a \$2,500,000 spur pipeline linking the main oil duct at Gretna, Man., to the refinery plant at East St. Paul should begin sometime in August, officials of the Winnipeg Pipeline company said.

Actual laying of the line will probably take from 60 to 70 days and will be completed this fall, it was reported. The 75-mile, 10-inch branch pipeline will have a 30,000-barrels-a-day capacity.

It will carry oil from the main new Edmonton to Superior Wls. oil line to the Imperial Oil company's refinery on the Henderson highway, 8½ miles north of Winnipeg, which is scheduled for completion in May, 1951.

Itching, Burning, Perspiring Feet

Go to any druggist today and get an original bottle of Moone's Emerald Oil. Don't worry — this powerful penetrating oil brings such ease and comfort that you'll soon be able to go about your work again, happy and without that almost unbearable aching and soreness. Rub on Emerald Oil tonight — freely; it does not stain — is economical. Money back if not satisfied. Good druggists everywhere.

THE TILLERS

PEGGY

WAKE UP YOUR LIVER BILE—

Without Calomel—And You'll Jump Out of Bed in the Morning Rarin' to Go. The liver should pour out about 2 pints of bile juice into your digestive tract every day. If this bile is not flowing freely, your food may not digest. It may just decay in the digestive tract. Then gas bloats up your stomach. You get constipated. You feel sour, sunk and the like.

It takes those mild, gentle Carter's Little Liver Pills to get these 2 pints of bile flowing freely to make you feel "up and up." Get a package today. Effective in making bile flow freely. Ask for Carter's Little Liver Pill, 8¢ at any druggist.

\$7,000,000 ORDERS FROM CANADA

It is estimated that exports to Canada this year of tubes and steel strip will exceed \$7,000,000 in value. Mr. M. G. Stewart, chairman of a U.K. firm said recently. This firm has also fulfilled an order valued at \$750,000 comprising 78 miles of pipe required for a 10-in. diameter pipeline to be built from Gretna, Manitoba, to the new refinery under construction at Winnipeg. The order was the direct result of a personal visit to Canada last November by a director of the firm.

Drive-In Bank Starts Business

VANCOUVER.—Now it's drive-in banks.

The Bank of Montreal's drive-in branch, first of its kind in Canada, opened for business here.

The customer drives up, hands over a deposit-slip, bank book and cash to the teller without leaving the car. The money is deposited by a rotating tray.

The teller is protected by bullet-proof glass and conversation is through an inter-communication system.

Methods Of Bringing Your Garden Furniture Up-To-Date

Sun-worshippers all over Canada this year are in for a colorful as well as a bright summer. The ingenious folk who manufacture lawn and garden furniture appear to have gone to town during the past year—and what with the new aluminum tube frames, and gay plastics, not to mention fast-dye canvas in brilliant shades of red, blue, green and yellow, they've produced functional furniture of the most comfortable kind which is, at the same time, highly ornamental.

Not everyone, however, cares to invest in such items. They may have a stock of well-built furniture that is every bit as comfortable, and they have no intention of scrapping it.

If you're one of these people, here's a way in which you can bring your furniture into line with the modern variety, and make it every bit as attractive and appealing. You'll need some new canvas, a few simple tools, exterior enamel and varnish and a lot of patience.

The first step is to repair all torn canvas on chairs. This should be removed, and the entire chair frame repainted. If there are any worn spots make sure they are sanded smooth. Nail holes should be filled with wood filler before repainting, and if the paint or varnish seems badly scratched, it might be advisable to apply a priming coat. It is always advisable to take careful note of the surface before painting, and perhaps such an examination will show considerable dirt and grime. This should all be removed with a cleaning powder and the whole piece should be rinsed off with clear water and allowed to dry thoroughly before paint is applied.

Metal surfaces which have rusted in spots should be cleaned with a wire brush or steel wool dipped in kerosene. Touch up bare metal with metal primer to prevent future corrosion. After the nail holes and cracks have been filled, and the primer of enamel undercoat has been applied and given time to dry completely, the second coat may be applied. Naturally, the more coats you apply, the more durable a finish you'll have.

Incidentally this year a white frame is particularly popular with canvas seating and backing in solid colors. As mentioned earlier these may be in blue, green, red or yellow. Any of the four show up strikingly against the brilliant white. The trend seems to be away from stains, but if you prefer the clear finish and the pleasant color of the natural wood, a light stain may be applied to bring out the grain, and the whole piece should then be finished with two or three coatings of spar varnish. It's advisable to sand lightly between each coat.

If any sizeable amount of garden furniture is to be treated, a helpful hint is to turn each piece upside down, painting the legs first. The chair or table may then be righted, and the job completed with a minimum of inconvenience to the painter.

After the paint or varnish is dry on garden chairs, the new canvas may be placed in position and firmly secured. Special tacks for such work are available at any hardware store.

Health

Artificial Respiration Potent Saver Of Lives

Artificial respiration has been known to be successful on an apparently drowned person who had been under water for as long as half an hour, says an editorial in the current issue of Health, official magazine of the Health League of Canada.

The editorial stresses the importance of widespread knowledge of artificial respiration, and comments that in this connection "apparently people forget very easily."

It is emphasized that "some years ago Health called attention to the supreme importance of a widespread knowledge of artificial respiration if death by drowning is to be prevented. Nine hundred deaths in a single year is a tragic fact because drowning is unnecessary." Some of these deaths might have been prevented if people generally had known what to do when a person appeared to be drowned.

Properly applied artificial respiration might save some lives this summer, states Health which then goes on to explain that artificial respiration should be started immediately the apparently drowned person is taken from the water. It should be kept up continuously for a minimum of four hours unless the victim had recovered consciousness or rigor mortis had set in.

"That these facts have been forgotten," says Health, "is shown by the fact that from time to time reports appear in the newspapers to the effect that artificial respiration has been discontinued in 20 minutes or half an hour in cases in which resuscitation may have been possible. This applies to both drowning and electrical shock.

The possibility of a laryngeal spasm which, unless released, might

RARE DOCUMENT GOES TO U.S.—Clayton Gray, author of "The Montreal Story", presents a vital historical document, uncovering new evidence in the Lincoln assassination to V. W. Clapp, assistant chief librarian, Library of Congress, Washington, D.C. The rare document is presented on the occasion of the fifth annual conference of the Canadian Library Association.

Princess Margaret Coming Of Age

LONDON.—An increasing number of engagements suggests that Princess Margaret is officially coming of age.

Although she will not be 21 for 15 months—she is 20 next August 21—she is becoming as active at official functions as any other member of the Royal Family.

The vivacious Princess Margaret now makes several speeches a week.

A year ago, she was making what might be called instructional visits to the House of Commons, the financial district of London, and other places. That phase of her public life appears to be over and the Princess, younger daughter of the King and Queen, now is on her own.

A spokesman at Buckingham Palace meanwhile said that as far as is officially known Princess Margaret has no definite plans for visiting Canada and the United States.

Such reports were current a year ago and were current again recently. "There was no truth in the reports then, and as far as we know there is none now," the spokesman said.

Some of Princess Margaret's duties as a member of the Royal Family are associated with her own particular interests. She now is colonel-in-chief of three regiments and patron, president or commodore of many different voluntary organizations.

SPEND LESS ON LIQUOR

WASHINGTON.—The commerce department reported Americans spent less on liquor in 1949 than in any year since 1944—\$8,550,000,000, a drop of \$250,000,000 from 1948 and \$1,000,000,000 below the post-war peak of \$9,640,000,000 set in 1947.

render artificial respiration ineffective, should be stressed," Health says. "Many people who drown don't drown but suffocate. These are shown at autopsy to have no water in their lungs. It is therefore important to call attention to the need for seeing that the air passages are clear and the tongue held out during artificial respiration."

VISITING FIREMAN

Store Worker Designer Of 1951 Nickel

OTTAWA.—Stephen Trenka, 40-year-old Toronto furniture store employee, will go down in history as designer of Canada's 1951 nickel.

Finance Minister Abbott named him winner of the design competition for a new Canadian five-cent piece to commemorate the 200th anniversary of the Isolation of nickel.

Mr. Trenka's design will feature a representation of a nickel refinery and three maple leafs. He will receive the first prize of \$1,000 when he submits a satisfactory plaster model from which a die can be cast.

Mr. Trenka, who came to Canada from Hungary 21 years ago said he used his model for the nickel refinery a smelter in Welland, Ont.—a town he visited while courting the girl who later became his wife.

"It feels good to know I have done something for Canada because Canada has done a lot for me," he said in an interview in Toronto.

His design has "Canada" inscribed above the representation of the nickel refinery, with "nickel" and the figures "1751-1951" at the upper left and the figure "5" and the word "cents" at the upper right. The three maple leaves appear at the bottom.

TRY AND STOP ME!

By BENNETT CERF

One afternoon during the war, a columnist noticed a taxi-driver in the lobby of a hotel dropping coin after coin into a pay telephone while a young soldier talked heatedly into the mouthpiece. After the soldier had departed, the cabbie explained, "When I picked the kid up, he was lonely and dying to talk to his girl friend in the west. So I got her on the line for him and kept pouring in quarters so he could have a good heart-to-heart with her." Said the columnist, "That's really a wonderful gesture on your part." "Forget it," said the cabbie. "I always keep a bunch of lead slugs in my back pocket for kids like that."

TERM USED IN PAINTING

The term "alligatoring" is used to refer to a painted surface on which cracks have formed which resemble the hide of an alligator. A common cause of this condition is the application of a finishing coat before the primer has thoroughly dried.

On The Side - By E. V. Durling

Men with big feet are the best husbands. That is what is repeatedly claimed. If there is anything to it Primo Carnera, the wrestler, should make a wonderful husband. He wears a size 17 shoe.

NAME THE ONE RESPONSIBLE

Who introduced you to the girl who became your wife? It could be, of course, that you wish they hadn't. However, if your marriage turned out to be a happy one you certainly owe the person who brought you together quite a debt of gratitude. You should send that person a present on your wedding anniversary.

BULLFIGHTER'S HUSBAND

Conchita Cintron, although now only 24, has been a bullfighter for 10 years. She actually started fighting bulls at the age of 14. She is currently paid an average of \$4,000 a performance. She is unmarried but says she is waiting for the "right man" to come along. I wonder what type of man would make the best husband for a female bullfighter?

HE-MAN DOGS

The favorite breed of dog among fashionable females is undoubtedly the French poodle. Most of these poodles live a life of ease and luxury. Seeing a French poodle, all dolled up as to hair clip, collar, etc., being led along by a smartly dressed female, you find it hard to believe that this breed of dog was originally used by Russians and Germans to fight bears. But such was the case.

LONGEVITY BY HOUSEWORK

Geriatrics is the study of longevity. Men of science specializing in this study try to figure out ways and means of enabling people to live to a healthy old age. One specialist in geriatrics says doing housework conscientiously and thoroughly makes a woman live longer. Call that to the attention of your wife, mister, the next time she refers to her housework as an arduous task. Tell her she is lucky not to have a maid to do the work as that would shorten her life.

PRACTISED HIS PREACHING

The average man spends one-third of his life in bed. John Healey, of Beverly, Mass., came to the conclusion this was a waste of time. That life is too short to spend one-third of it sleeping. So he decided to sleep only three hours out of 24. Mr. Healey reached that decision 31 years ago. He has followed it religiously. He hasn't been to bed in 31 years. He sleeps in a rocking chair. He is 92 years old. He smokes 10 cigars a day and is still active in business.

TALL PEOPLE, TALL CHILDREN

Tall parents usually have tall children. That's what the records reveal. On the other hand, small parents very often also have tall children. Some averaged-sized parents who had a tall child were those of Jim Cully, the Irish wrestler, known as the Tipperary Giant. Jim is seven feet, two inches. Nevertheless Jim's height is considered hereditary. His grandfather was seven feet, six inches tall. Incidentally, that great boxer, John L. Sullivan, was a six-footer. John L.'s father was a small man. However, his mother was nearly six feet tall and a very powerful woman.

ULLABY FOR HEALTH

Have you an infant in your home? Does your wife sing it to sleep with a lullaby? An expert on child rearing says all mothers should sing their babies to sleep, that it improves the infant's health. I knew a young mother who regularly sang her offspring to sleep. But not with an old-fashioned lullaby. She just hummed that ditty titled, "When the Midnight Choo-Choo Leaves for Alabama".

P.C.—Annapolis-King's

Shown above are the three members of parliament who were recently elected to Ottawa in three by-elections. From left to right are, Leon D. Crestohl, Liberal, Montreal-Cartier; S. P. Balcom, Liberal, Halifax, and George Nowlan, national president for the P.C.'s, who recaptured the Annapolis-King's seat which he held before the general election last year.

R.C.A.F. STUDIES U.S. GUIDED MISSILES—Flt.-Lieut. T. J. B. Robinson, (left), Stratford, Ont., and Sqdn. Leader William A. Hockney, Mimico, record technical data on a guided missile exhibit at the U.S. Air Force exhibit unit, Dayton, Ohio. They were among a group of six R.C.A.F. officers who made a recent survey trip to study the exhibit, which presents the new global concept of air power to the public through theme and static equipment displays. Seen in the exhibit is a "Firebird" guided missile.—Central Press Canadian.

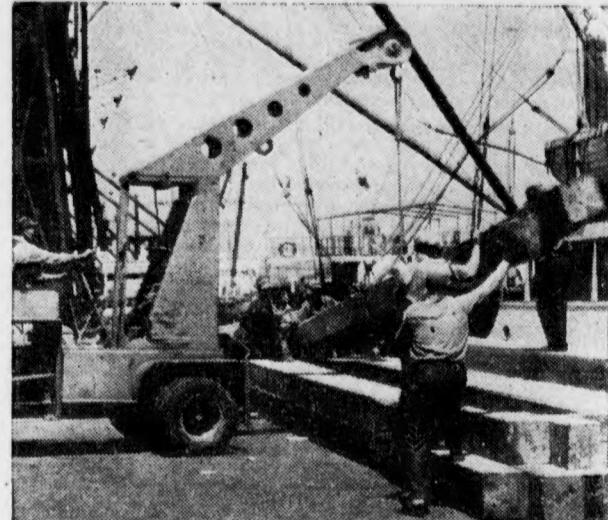

GERMAN CONSUL FOR BRITAIN — The first post-war diplomat from Germany to Britain is Dr. Hans Schlange-Schoeninger. Officially he has the title of consul-general and will look after the welfare of German nationals in Britain and deal with political questions.

INDIAN GIRLS CHOSEN FOR FILM TESTS — The two Canadian girls seen above were chosen in Toronto recently by an M-G-M talent scout to go to New York for film tests to determine whether they would be suitable to play the role of an Indian girl in Clark Gable's next movie. On the left is Wanda (Big Canoe) Adamson of Christian Island, Lake Simcoe, Ont., a full-blooded Ojibway beauty, while on the right is Dorothy Beauvais, a part Iroquois from Ste. Marguerite, P.Q. She is a post-mistress.

B.C. Lumber To Montreal

The first B.C. lumber brought to Montreal by ship since pre-war days is shown being unloaded on the waterfront from the freighter Caledonian Monarch. Once a regular trade the movement of lumber from the west coast to Montreal via the Panama canal is being resumed.

BRITISH, DANISH ROYAL FAMILIES UNITE — Prince George of Denmark poses with his fiancée, Viscountess Anson, 32-year-old niece of Queen Elizabeth, shortly after their engagement was announced recently. The prince is acting military attaché of the Danish embassy in London.

SIR BRIAN RELINQUISHES BERLIN POST — Brigadier General Sir Brian Robertson, who had been serving as British high commissioner in Germany, is shown waving a farewell to the "courageous" population of Berlin from the steps of the town hall before he left for England. With him are Berlin's mayor Ernst Reuter and Mrs. Robertson. Sir Brian's U.S. and French colleagues attended the farewell ceremony.

HUNGER DIDN'T SLOW HIM DOWN — Willy Schmitz, champion starver of Germany, is shown in the glass cage at the Frankfurt zoo where he beat his own record of 50 days without food. Willy had just broken his old record when he heard that the gendarmes were on their way to get him on fraud and embezzlement charges dating back to 1845. Willy fled the cage and made a clean getaway before the police arrived.

CANNON FIRED AT INVADING FORCES — Uniforms of British and American forces of the 1812 era added color to the formal reopening of Fort George, Niagara-on-the-Lake. Blank cannon were fired this time at the friendly "invaders", some of whom are shown here entering the fort. The original buildings were destroyed by the British in the war of 1812 to prevent them falling into American hands.—Central Press Canadian. 2888

FOUND SECRET OF BOOM TIMES — U.S. Secretary of Labor Maurice J. Tobin told the International Labor conference in Geneva, Switzerland, that social and economic legislation had banished forever a U.S. depression similar to that of the 1930's. "The supports put under U.S. economy, he said, had proved their capacity to prevent business slumps."

GERM-FREE — This odd-looking effect is achieved by taking a photo of a man in a plastic helmet and diving suit under two feet of water. The diver is descending into a germicidal solution at a Notre Dame university laboratory at South Bend, Ind., in preparation for a trip into a germ-free room where animals are studied in a state absolutely free of bacteria. It is the first experiment of this kind in history.—Central Press Canadian.

Believe In It If You Wish

But Water Diviners Have Caused A Lot Of Dry Wells

By WELDON D. WOODSON
(CPC Correspondent)

All of us have heard our grandfathers tell about finding water by means of a forked twig. His instructions were simple: hold a fork in each hand, the fingers facing up, and the butt end straight out.

Slowly walk around the area where you wish to drill a well. When you reach the site where there is water, the butt end will point down. This occurred, he insisted, even if you tightly squeezed each prong and tried to prevent it.

Yet, we don't need to go back to the horse-and-buggy age for water witches, diviners, or dowsers, as those who purportedly discover water by this device are called.

In rural and small-town communities—California, Indiana, Ohio, Pennsylvania, Texas—throughout our nation there are persons "gifted" in this art. They are not necessarily old or even middle-aged. Likely as not, the water diviner will be in his early twenties.

Some assert that the Bible, where it speaks of Moses as "smiting the rock" (Numbers XX, 9-11), refers to the devining rod. There are other early-day historical allusions, from Pliny to Marco Polo.

According to a report by one investigator, from the 16th century to 1916, there were 607 references to it in books and magazines. Since then there have been many more. Recently, a magazine printed a "reader's letter" which approved it. Immediately, the editor was swamped with mail, some upholding it, others branding it as nonsense.

There have been many explanations. Of course, the water diviner asserts that somehow the water attracts, or pulls, the twig and it bends down. The U.S. government, however, rejects this.

"To all inquiries the United States Geological Survey therefore gives the advice," it declares, "not to expend any money for the services of any 'water witch' or for the use or purchase of any machine or instrument devised for locating underground water or other minerals."

In reviewing the many theories, it points out that they have varied from

what is considered the work of the devil to an idea that elves had a hand in it.

One suggestion is termed "unconscious muscular action," that the diviner, as he concentrates, unawares slightly twists his hands and contributes toward the twig dipping down.

During the last war, a controversy arose in the British army as to whether to use water diviners in the arid Middle East. Officially, the idea was condemned, although individual officers employed them on a few specific projects.

The most telling blow against it comes from a report concerning New South Wales, 1918 to 1939. Of 1,753 wells divined, 70.4 per cent., or 1,234,

resulted in bores which supplied serviceable water estimated at 100 gallons or over per hour.

In contrast, of 1,675 wells not divined, 83.9 per cent., or 1,406, furnished that many, or more, gallons per hour.

In bores of serviceable water less than 100 gallons per hour, or where unserviceable water was obtained, wells divined ranked better. On the other hand, in bores classified as absolute failures, no water of any kind obtained, 14.7 per cent., or 257, were chalked up against wells divined; merely 7.5 per cent., or 126, to wells not divined.

So it looks like the debate on water witches will be with us for a long time.

—Central Press Canadian.

Alice Brooks

The thoughtful gift is the personal gift! So let this be your way of saying "Greetings" on a happy day. Three designs!

His, Hers, Mr., Mrs., all in exquisite flower frames! Pattern 7483; transfer 12 motifs, 5 x 5½ in.

Our improved pattern—visual with easy-to-see charts and photos, and complete directions—makes crochet and knitting easy to do.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,
Winnipeg Newspaper Union,
60 Front Street W., Toronto.

Be sure to write plainly your Name,
Address and Pattern Number.

IN HOSPITAL AFTER EATING FIREWORKS

NEWARK, N.J.—"Mommy, we just ate some candy and our throats are burning," said Sharon Pierce, 4, and her sister, Linda, 3. In hospital, they were reported in fair condition. Their "candy" was pill-sized fireworks known variously as snakes, Sooners' eggs and Pharaoh's serpents. When ignited they resemble small, wriggling snakes.

Helpful Hints

Doctors say you should try to avoid emotional upsets at mealtime—such upsets tend to upset digestion.

Just a reminder: Turn handles of pots and pans away from the edge of the range to prevent accidents.

To prevent the bottom crust of custard or pumpkin pie from becoming soggy, brush all over with beaten egg white before adding the filling.

Elbow room is important when you're washing dishes. Leave space to stack soiled dishes on one side and a counter or table for clean ones on the other side.

When washing silver or plates or dishes which have been used for fish, add 1 tablespoon of vinegar to the water. You will find it will make all traces of fishy smell disappear at once.

Baked potatoes lose little of their food value and retain most of their vitamin C, lost in other forms of cooking.

Sask. Coyote Killing Successful

REGINA.—A total of 683 coyotes have been killed by cyanide "getters," den hunting and shooting since the provincial game branch's spring coyote control program got underway about the middle of May, W. A. Hartwell, provincial game supervisor, said.

This total represents reports from 14 out of the 19 control districts in the province, Mr. Hartwell said in a bureau of publications news release.

Evidence of the efficiency of "1080" poison bait as a coyote killer has been received by the game branch.

Sheep ranchers in the southwest part of the province are said to be particularly enthusiastic, while farmers are also reporting large decreases in losses of calves and chickens to coyotes, the game supervisor pointed out.

It is still too early to compare results of new control methods with the bounty system, Mr. Hartwell said. American states using "getters" and "1080" poison have reported good results where the bounty system failed to curtail coyote activity.

RECIPE HINTS

SUGAR-GLAZED SHORTCAKE

Three cups biscuit mix, 3 tbs. sugar, light cream, 3 tbs. butter, 1 tbs. heavy cream, 2 tbs. sugar.

Combine biscuit mix and 3 tbs. sugar. Add light cream (about ½ cup) enough to make a soft dough. Divide dough in half. Pat half into greased 9-inch square cake pan. Dot with half the butter. Cover with remaining half of dough rolled out into

9-inch square. Brush top with cream; sprinkle with sugar; dot with remaining butter.

Bake in hot oven, 450 degrees F., about 18 minutes, or until golden brown. Remove from pan; split into two layers. Fill and top with crushed, sweetened strawberries. Cut into squares to serve. Serve with plain or whipped cream, as preferred. Yields 9 servings.

University Of Alberta Expands With Times

EDMONTON.—The University of Alberta is keeping abreast with the building boom in Edmonton. Four large new buildings and an addition to the University Hospital are expected to be completed this year at a cost of about \$6,750,000. This will bring the cost of post-war building on the campus to more than \$8,000,000.

Scheduled for opening at the end of the year is the Rutherford Memorial Library. Named in honor of Alberta's first premier, A. C. Rutherford, it cost an estimated \$1,750,000. The library will consolidate existing faculty and main libraries on the campus and house the University's extension library. Capacity of the four-storey structure is 265,000 volumes and 800 to 900 readers.

The Student's Union building, dream of university students for the last 25 years, is expected to be ready for summer-school students in July.

Built at an estimated cost of \$470,000, the building will contain a men's and women's lounge, a mixed lounge and faculty room, along with offices for student publications and administration. A recreation room is being constructed in the basement. This is the first unit of a proposed three-unit student centre. Other units will house gymnasium and auditorium.

Costliest building on the campus is the \$2,500,000 addition to University Hospital, expected to be completed in December. It will provide facilities for modern obstetrical and children's wards.

Alberta's latest tuberculosis sanatorium is the Aberhart Memorial Hospital, being constructed for approximately \$1,500,000. The four-storey building will provide facilities for about 400 patients. With all beds in rooms boasting a southern exposure and supply and preparation rooms on the north side, it will be sound-proof throughout.

A \$400,000 public health building is to be ready in September. It will house facilities for the provincial laboratory and be a centre for cancer research on the university campus.

Other buildings and extensions completed since the war include two large four-storey wings on the medical building at a cost of \$850,000 and a \$65,000 University Works Department building.

Proposed construction for which plans have not yet been drawn up include an agricultural and biological science building, an engineering building and administration and fine arts building.

Several classrooms and offices still are housed in prefabricated structures and quonset huts erected during the unprecedented influx of veterans after the last war.

Seasickness Not Inevitable

Seabreezes and ocean travel are traditionally associated with health and pleasure, and there will be hundreds of Canadians who elect to go down to the sea in a ship this holiday season.

But, as with experience ashore, enjoyment and benefit to health at sea will be in direct relationship to one's health and will often depend upon the traveller's prudence and wisdom.

Seasickness is not inevitable, because it is preventable. Five rules to follow are:

1—Suppress fear of being seasick.
2—Relax to the motion of the ship—don't fight it.

3—Spend as little time as possible in staterooms, saloons, and washrooms.

4—Keep on deck as much as possible, and stay as close to the centre as you can.

5—Don't hesitate to pass up a meal and by all means don't overeat or drink.

Smile of the Week—

A suburbanite sitting at his window one evening casually called to his wife: "There goes that woman Charley Jones is so terribly in love with."

His wife, in the kitchen, dropped a plate, knocked over a lamp, and craned her neck to look out the window.

"Where, where?" she panted.

"There," he pointed, "that woman in the gabardine suit, on the corner."

"You idiot," she hissed, "that's his wife."

"Yes, of course," he replied.

OUR COMPLETE SHORT STORY

The Charity of Bertram Wolt

By F. R. JONES

He Decided His Conscience
Wasn't Going To Leave
Him Alone.

IT DIDN'T exactly give him a new reputation—after all these years I guess nothing could do that—but it sort of brightened up his old one. When people in Melford refer to Bertram Wolt now as "that mean, selfish little rat," they are apt to add, "although maybe he's not all bad."

At first nobody believed Wolt had really done it. Then they began to look for sensible reasons—such as the story that went around that Harry Martin knew something Bertram didn't care to have told, and that was why he had been let off. But Harry himself stopped that story.

"If I knew anything like that you don't think I'd settle for the measly salary Wolt pays me, do you?" He laughed. "Boy, I only wish I did."

I've known Bertram Wolt for fifteen years, and I've been a doctor a lot longer than that. And when I first heard the story I didn't believe it either. I refused to admit that what I thought I'd learned about human nature was all wrong.

I guess there's nobody in Melford who doesn't know who Bertram Wolt is. The Wolt Furniture Manufacturing Company isn't very big, as furniture factories go, but it's the largest business in town. Wolt started out as a cabinetmaker here—they say he turned out some pretty good pieces—but now his factory makes only the cheapest grade of furniture and the workmanship is inferior.

"The thing that influences people most is money," Bertram is fond of saying. "If I offer them a table that's almost as good and a lot cheaper, that's what they want."

And it seemed to work out. To keep his costs down he paid barely enough to keep the jobs filled. He gave raises as though they came out of his own pocket—and therefore lost all his good men as soon as they learned enough to hold a job somewhere else. He wasn't above promising a man a raise, with no intention of giving it, just to hold him a little longer. His factory was an old barn-like place, as dirty and uncomfortable as the law and the inspectors would allow. In short, he would do anything he could get away with to make money and he never pretended otherwise.

He told me once, "Doc, you've never been in business so you don't know anything about it. But I started with a one-man shop forty years ago, and in all that time I've never met a man who wouldn't cheat me out of everything I had if I'd let him. You've got to beat the other fellow or he'll beat you. Take those fellows in the factory—if I didn't ride them they'd spend half the day reading newspapers or playing cards. Take it from me, Doc, in business nobody does anything except for what he can get out of it."

So when Harry Martin walked in—

I Was Nearly Crazy With Fiery Itch-

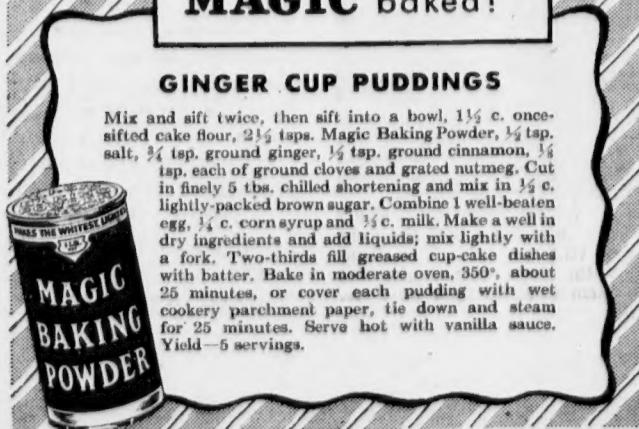

Until I discovered Dr. D. D. Dennis' amazing fast relief—D. D. Prescription. World popular, this pure, cooling, liquid medication specially prepared for skin troubles caused by eczema, pimples, rashes, athlete's foot and other itch troubles. Trial bottle, 30¢. First application checks even the most intense itch or money back. Ask druggist for Dr. D. D. Prescription (ordinary or extra strength).

Approximately 64 per cent. of the bacon exported to the United Kingdom from Canada originated in the western provinces.

Tasty? Sure, they're MAGIC baked!

GINGER CUP PUDDINGS

Mix and sift twice, then sift into a bowl, 1½ c. once-sifted cake flour, 2½ tbs. Magic Baking Powder, ½ tsp. salt, ¼ tsp. ground ginger, ½ tsp. ground cinnamon, ½ tsp. each of ground cloves and grated nutmeg. Cut in finely 5 lbs. chilled shortening and mix in ½ c. lightly-packed brown sugar. Combine 1 well-beaten egg, ½ c. corn syrup and ½ c. milk. Make a well in dry ingredients and add liquids; mix lightly with a fork. Two-thirds fill greased cup-cake dishes with batter. Bake in moderate oven, 350°, about 25 minutes, or cover each pudding with wet cookery parchment paper, tie down and steam for 25 minutes. Serve hot with vanilla sauce. Yield—5 servings.

"Princess Pats" Don't Bat An Eyelash

The sun, the heat and the excitement were too much for one member of Princess Patricia's Canadian Light Infantry during a full dress rehearsal for the "Trooping the Color" at Currie Barracks, Calgary. Perhaps no better example of the split-second precision timing and training achieved by the Patricias for this colorful event can be given than the picture above. As the "Color" is trooped through the ranks, the "escort to the Color," performing the ceremonial and difficult slow march, can be seen marching over the body of their prostrate comrade without so much as a mistake in timing and hardly a downward glance. The fallen man is lying stiffly at attention, exactly as he was before he fell.

Western Briefs

Cougar In Park?

VANCOUVER.—Ten persons have reported they have seen a cougar in Stanley park. The last cougar shot in the near-downtown park was 30 years ago.

Head Seed Growers

FREDERICTON.—W. H. Beaumont of Vernon, B.C. was elected president of the Canadian Seed Growers' association at its annual meeting here. He succeeds H. P. Wright of Calgary.

B.C. Cheddar Cheese

SALMON ARM, B.C.—A new butter and cheese plant under construction here will produce British Columbia's own cheddar cheese of a quality expected to equal that of Ontario. The Dairy Co-operative building the plant has been subsidized by the federal government.

Hotel Sold

VANCOUVER.—Incola Hotel, on shores of Okanagan Lake at Penticton, has been sold to Hencott Houses Ltd., headed by John Adams of Saskatoon. The building, containing 80 rooms, will be renovated and a beverage room annex added. Investment in the project is estimated at \$250,000.

Against Capital Punishment

WINNIPEG.—The Manitoba conference of the United Church condemned capital punishment as having no place in the administration of justice. Mr. Justice F. A. E. Hamilton, retired Juvenile Court judge, said capital punishment "cannot be defended from the legal, medical, moral or religious standpoint."

Honors Printer

EDMONTON.—North America's oldest trade union recently honored Canada's oldest active union printer. He is William J. (Pal) Power, a member of the Edmonton Bulletin staff since 1906. Mr. Power received his 60-year button from the International Typographical Union. He is the only 60-year member in the country still actively engaged in his trade.

SNOW FROM B.C. FIRST EVER SEEN

LOURENCO MARQUES, East Africa.—There was snow in this tropical port for the first time in history recently, but it came from British Columbia.

Surprised dock workers, stripped to the waist in the broiling heat, had to use crowbars to pry loose logs in a ship's hold. They were frozen together.

The vessel loaded at New Westminster, B.C., at the height of a late winter storm, and the logs remained frozen, with snow between them, despite a long voyage through the tropics.

MASCOT GROWS UP
LONDON.—The famous Scottish Black Watch Regiment has had to send its mascot back to where it came from. The mascot was a cub lioness. But now she's a "big girl" and has had to be sent back to Africa.

PRICE OF HONESTY

FERNIE, B.C.—The price of honesty has been established at \$2, less express charges. A waitress and cashier who took charge of a handbag containing \$700 left in a restaurant received a \$2 reward from the owner. Express charges totalled 56 cents—leaving \$1.44 to be split two ways.

Circus tights were introduced in 1828.

EXPENSIVE FLOWERS

VANCOUVER.—Twenty dollars is a lot to pay for a bouquet of flowers, even choice tulips. But that's what 18-year-old Arthur Finlayson had to pay. The flowers came from the city's Stanley Park, and he was fined for damaging the flower beds.

FOUNDED IN 1865

The Salvation Army, founded in London in 1865, was first known as the East London Mission.

"SALADA"

ORANGE PEKOE

Looks pretty—Tastes pretty WONDERFUL!

Fruit Bread—made with New Fast DRY Yeast!

KNOBBY FRUIT LOAVES

Scald 1½ c. milk, ¾ c. granulated sugar, 2 tbs. salt and ½ c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl ¾ c. lukewarm water, 3 tbs. granulated sugar; stir until sugar is dissolved. Sprinkle with 3 envelopes Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 minutes. THEN stir well. Add lukewarm milk mixture and stir in 2 well-beaten eggs, ½ c. maraschino cherry syrup and 1 tsp. almond extract. Stir in 4 c. once-sifted bread flour; beat until smooth. Work in 2 c. seedless raisins, 1 c. currants, 1 c. chopped candied peel, 1 c. sliced maraschino cherries and 1 c. broken walnuts. Work in 3½ c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and

grease top of dough. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Punch down dough, turn out on lightly-floured board and divide into 4 equal portions; cut each portion into 20 equal-sized pieces; knead each piece into a smooth round ball. Arrange 10 small balls in each of 4 greased loaf pans (4½" x 8½") and grease tops. Arrange remaining balls on top of those in pans and grease tops. Cover and let rise until doubled in bulk. Bake in moderate oven, 350°, about 1 hour, covering with brown paper after first 1½ hour. Spread cold loaves with icing. Yield—4 loaves. Note: The 4 portions of dough may be shaped into loaves to fit pans, instead of being divided into the small pieces that produce knobby loaves.

LITTLE NEWS ITEMS OF LOCAL INTEREST

A number of dishes and some cutlery left at the park booth after the school picnic has been turned in to The Chronicle. Owners of the articles are requested to pick them up at the office.

Last week the tennis courts were raked and levelled and the fence wire put up. Monday evening tapes were laid but rain stopped completion of the work. It is expected one court will be ready for use in the near future.

Len Hay suffered a heart attack on Sunday and is confined to bed at his home.

Father Killen of Rockyford, who took part in the annual pilgrimage to Rome, will speak on his visit to the Holy City at a non-denominational gathering in the Carbon Scout Hall Tuesday evening, July 18. He will also talk on the places he visited en route. Everybody welcome!

T.J. King Sr. and Tom Jr. are on a two week motor trip through the States and B.C.

Mrs. George Smith and children of Drumheller were Friday visitors at the home of Mr. and Mrs. Charles Graham.

Mr. and Mrs. Charlie Cave were Calgary Stampede visitors Monday.

Charlie Pattison, Violet Patterson, Don and Gordon McLeod and Bob Knecht motored to Sylvan Lake on Sunday for the day.

Mr. and Mrs. William Renn of Rosebud and Rev. and Mrs. E. J. Lautermilch of Woodrow, Sask., were Sunday visitors at the home of Mr. and Mrs. Clarence Grose.

Mr. and Mrs. Hubert Coates left Sunday on a motor trip to United States and B.C. points.

Rockyford United Church picnic was held in the Carbon park on Thursday of last week.

John Atkinson has completed excavation of a basement north of the Carbon school and we understand that Mosher school will be moved to the site when the foundation is completed.

All Carbon Legion members are reminded of the annual picnic planned for next Wednesday, July 19. Be sure to attend with your families and bring a picnic lunch. Returned men who are not Legion members are cordially invited to attend with their families. An excellent afternoon of fun is promised for young and old.

Mr. and Mrs. J. F. Ohlhauser returned last Thursday from a month's motor trip to the United States, where Mrs. Ohlhauser saw her sister, Mrs. John Rehl of Besie, Oklahoma, for the first time in 45 years. Mr. and Mrs. Ohlhauser travelled extensively through Oklahoma, Kansas, Colorado and Idaho, covering 6,000 miles with no car trouble. Mr. Ohlhauser reports that crops in the states he passed through were being harvested and averaging from 2 to 10 bushels per acre. Stands of grain from Macleod north to Carbon were by far the best he saw on the trip.

Time to Treat Crops With 2,4-D

The essence of success in the control of weeds in growing crops by 2,4-D rests not only in employing the right chemicals at the right concentrations but also in spraying or dusting at the right stage of weed and crop growth.

Treat Early. It cannot be stressed too strongly that the best results with 2,4-D are obtained when annual weeds such as Wild Mustard and Stinkweed are treated in the seedling stage. Once annual weeds have grown large their resistance to 2,4-D increases rapidly. In consequence, the later the spraying or dusting is left the greater will be the amount of 2,4-D required to obtain a first-class kill; and the longer will the weeds be given a chance to compete with the crop. Treat early.

Stage of Crops. Although it is important to treat the weeds as soon as the seedling stage is reached it is equally important to bear in mind the stage of crop growth. Too early or too late treatment with 2,4-D is likely to lead to crop injury. In the case of cereal crops (wheat, oats, and barley) it is essential to wait until the grain plants are in the 3-leaf stage, or about 6 inches high, before they are treated. 2,4-D should not be applied to cereal crops after the plants have reached the early shot-blade stage. On no account should cereal crops be treated when the plants are in the flowering or early-heading stages of growth. With flax, treatment with 2,4-D should be made at the earliest opportunity after the flax plants have formed 4 or 5 leaves, since the weeds then will be more readily killed. Flax crops should not be sprayed or dusted with 2,4-D once the plants have started to bud. Late treatment of flax is likely to cause serious crop injury.

Seek Advice. More detailed information on the proper time to apply 2,4-D can be obtained from your local Line Elevator Agent. Ask him for a copy of our "2,4-D Time Treatment Chart." Remember early treatment with 2,4-D is essential for effective, economical weed control.

Have you had any visitors during the past week? Have you been host to any of the local organizations? We would appreciate having these news items and stories for publication. Send them in or bring them to the Carbon Chronicle office.

USE THE CLASSIFIEDS

New Skills for Greater Production

A manufacturer of electrical equipment (right) learns new skills at a training-within-industry institute, set up at Paris with the help of the International Labor Organization (ILO), a U.N. Specialized Agency. The manufacturer will show the new methods he has learned to his foremen who will pass them along to their workers.

FOUND—One Key with chain, ring and ornament. Apply at Chronicle office.
